Student Medication Policy

Rationale:

Staff are often asked by parents to administer medication to their children while at school. It is important that such requests are managed in a manner that is appropriate, ensures the safety of students, and fulfils the duty of care of staff.

Aim:

To ensure the medications are administered appropriately to students in our care.

Implementation:

- Children who are unwell should not attend school.
- An agreed staff member will be responsible for administering prescribed medications to children.
- Non-prescribed oral medications (eg: headache tablets) will not be administered by school staff without the express verbal/written permission of parent/guardian.
- All parent/guardian requests for school to administer prescribed medications to their children must be in writing on the form provided and must be supported by specific written instruction from the medical practitioner or pharmacist including the name of the student, dosage and time to be administered (original medication bottle or container should provide this information).
- Requests for prescribed medications to be administered by the school 'as needed' will cause the school to seek further written clarification from the parents.
- All student medications must be in the original containers, must be labelled and must be stored in the locked medication safe.
- Classroom teachers will be informed of prescribed medications for students in their charge and classroom teachers will release students at prescribed times so that they may receive their medications.
- All completed Medication Management Plans and details relating to students, their prescribed medication, dosage quantities and times of administering will be kept and recorded in a confidential official medications register located in the school office.
- Medication for school excursions will be dispensed in advance upon receipt of a completed "Request For Advance Dispensation Of Student Medication" form from the relevant teacher. The medication will then be set aside for the teacher to collect at time of departure from the school on that excursion.
- Students involved in school camps and excursions will be administered prescribed medications by the "Staff Member in Charge" in accordance with the camp medication checklist.
- Parents/Carers of students who may require injections are required to meet with the principal to discuss the matter.
